

The European Union Twinning Project for Turkey
“Capacity building to implement the Flood Directive”

TR 10 IB EN 01

CAPACITY BUILDING TO IMPLEMENT THE FLOOD DIRECTIVE

Presentation of the project results

Ankara, 22 October 2014

Project title: Capacity Building to Implement the Flood Directive.

Beneficiary Institution/Country: TURKEY

Duration of implementation: 29 months

Date: August 2012-December 2014

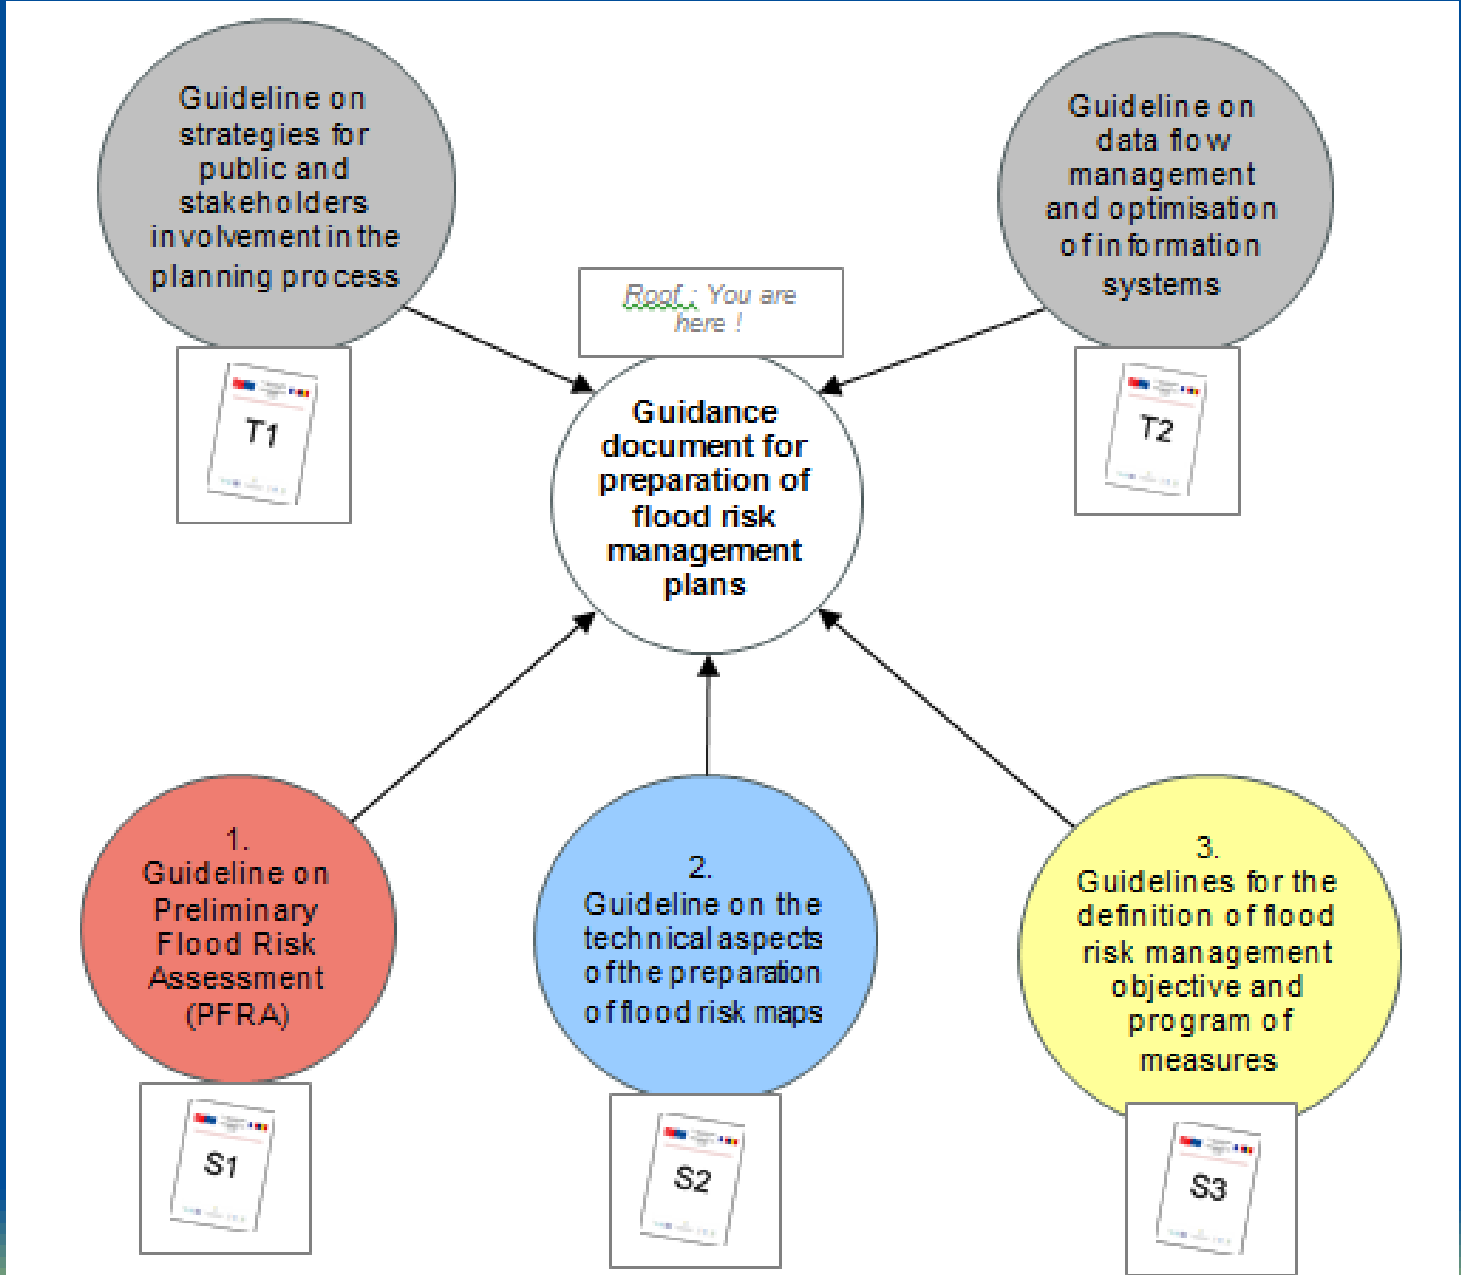

Project general purpose

- Building up an administrative and technical capacity in the General Directorate for Water Management and other Turkish institutions in order to transpose and implement Flood Directive in Turkey (2007/60/EC) and as a consequence to reduce the adverse consequences of floods

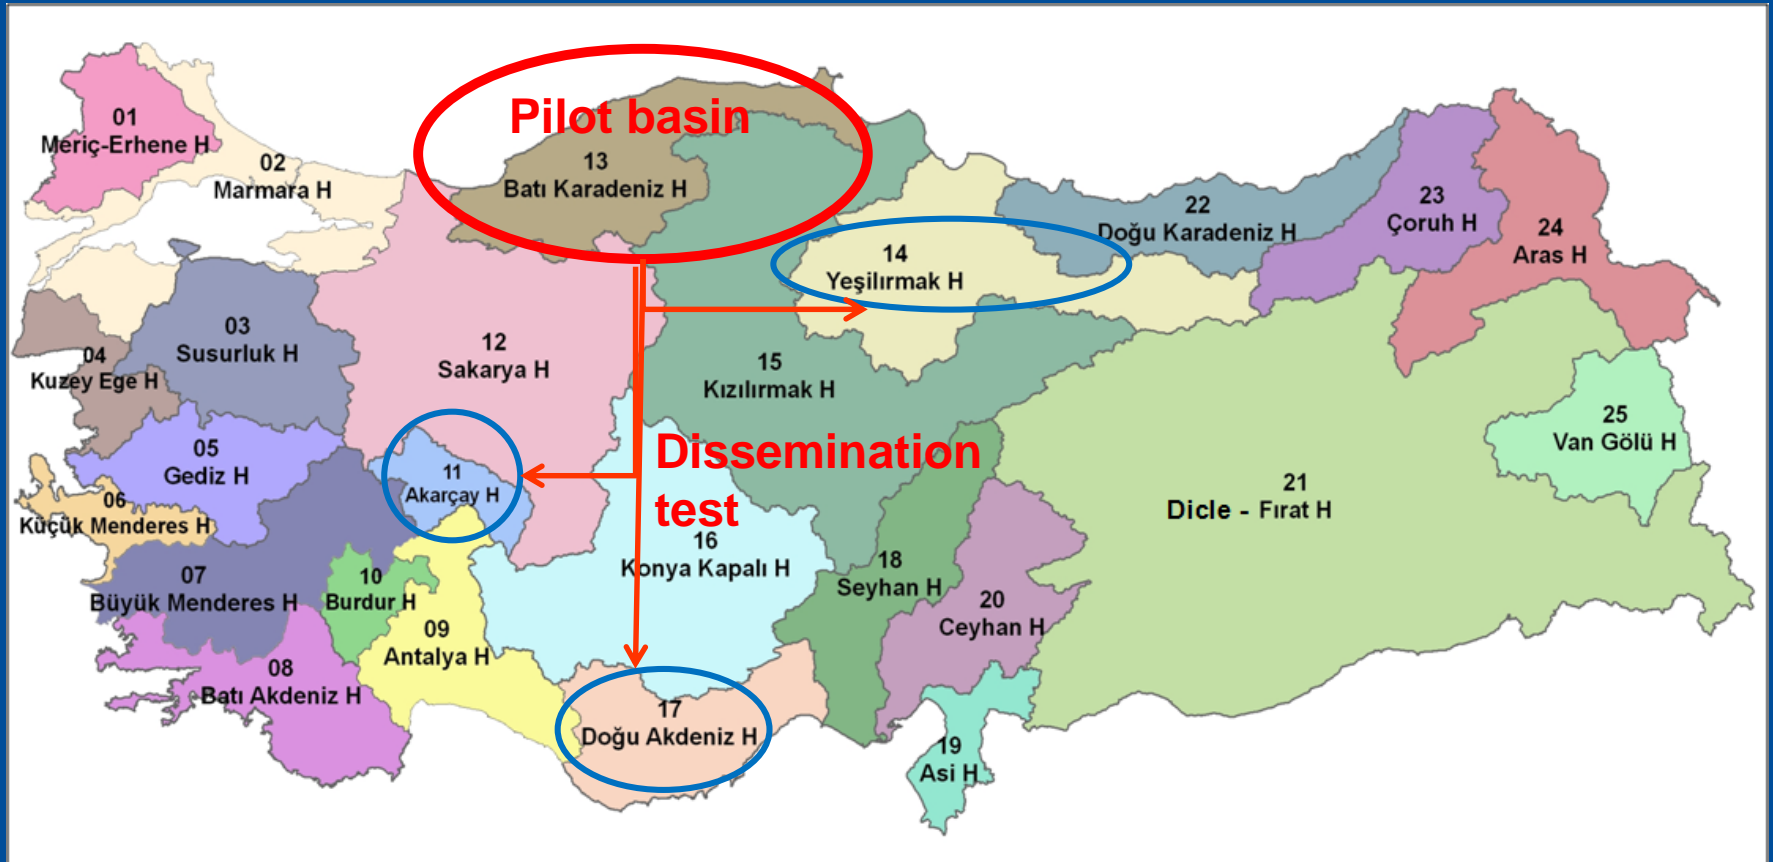

Main outputs after over 2 years of project implementation

- Enhancing juridical capacity, and improving technical and institutional capacity.
- Draft regulation on flood management and flood management plans proposed.
- Pilot implementation of the flood directive in the Batı Karadeniz basin with presentation of the results to the stakeholders.
- Presentation of the methodology for FRMPlanning in a guidance document
- Questionnaire for data availability analysis on test on the 3 quick scan basins for future flood directive implementation based on Batı Karadeniz results developed.
- Dissemination of the pilot basin experience and launching of the work in 3 new basins
- Preparation of National Implementation Plan for the Flood Directive including cost of implementation
- 4 study visits (2 in France and 2 in Romania)

Guidance structure for FRM Planning

A comprehensive test of flood directive implementation: on the pilot basin and dissemination and launching the work on 3 basins

■ 2nd study visit in France :
